

****PHISHING ANALYSIS REPORT 1 ****

Classification: CONFIDENTIAL | TLP: AMBER

Date: 13th June, 2026

Analysis by: Shubrajit Dey (zep11) – SOC L1

[Target URL]: [https://sbcverify-143788\[.\]webflow\[.\]io/](https://sbcverify-143788[.]webflow[.]io/)

1. TARGET URL ANALYSIS.

1. **URL:** [https://sbcverify-143788\[.\]webflow\[.\]io/](https://sbcverify-143788[.]webflow[.]io/)
2. **Hosted by:** Web flow (Legitimate website Hosting site)
3. **Brand Impersonated:** SBC Communications
4. **Objective:** Creating fake Site to collect data

2. INITIAL URL ANALYSIS

1. “verify” keyword is used which is mostly used by phishing
2. “143788” Random generated Number.
3. Using legitimate website hosting site (webflow.io) to make the domain legitimate
4. SSL present but does not provide legitimate platform.

3. EMAIL AUTHENTICATION ANALYSIS

Category	Result	Meaning
SPF	NOT FOUND	No authorized mail servers defined for this domain,
DMARC POLICY	NOT FOUND	No policy to reject or quarantine spoofed emails

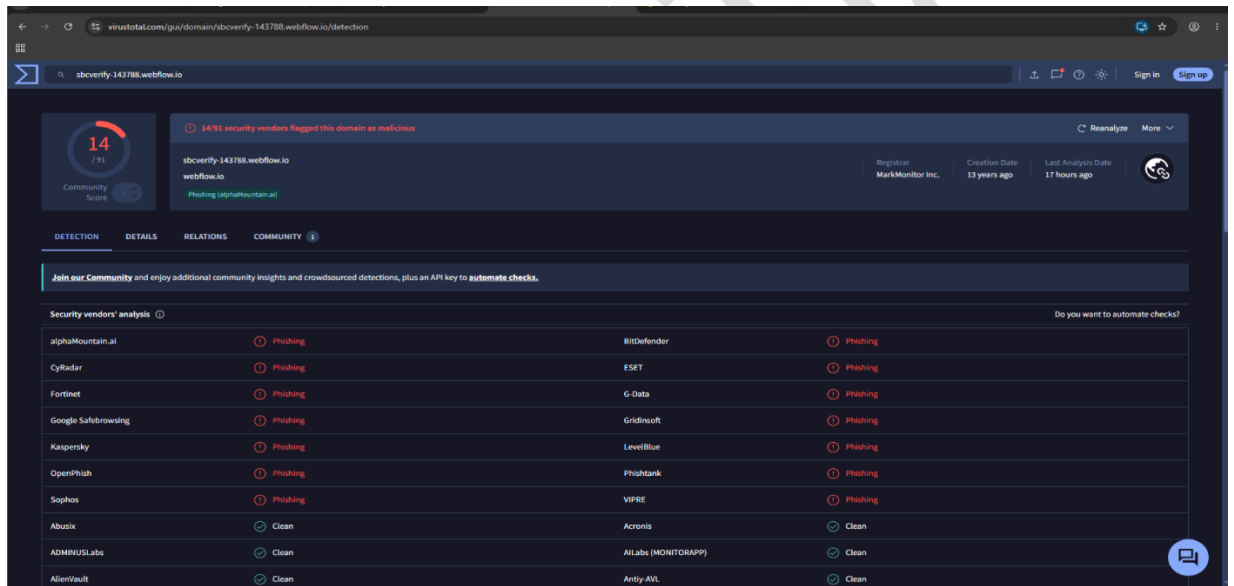

Note: A legitimate organization such as AT&T/SBC would always have SPF, DKIM, and DMARC properly configured. The complete absence of any three email authentication records is a strong indicator that this domain is not affiliated with any legitimate entity and is designed purely for malicious purposes.

4. THREAT INTELLIGENCE ANALYSIS

4.1 VIRUS TOTAL SCAN

Field	Result
URL Scanned	https://sbcverify-143788[.]webflow[.]io/
Verdict	PHISHING CONFIRMED
Detected By	AlphaMountain.ai
Category	Phishing
Note	Low vendor count (14) due to trusted Domain.

4.2 IP ANALYSIS

Field	Result
IP	172[.].64[.]151[.]8 and 104[.]18[.]36[.]248
ISP	Cloudflare.inc
Hosting Country	United States of America
Domain	1 day Old from the date of Reporting

Img Ref :

5. INDICATORS OF COMPROMISE (IOC's)

IOC Type	Value
Malicious URL	https://sbcverify-143788[.]webflow[.]io/
Domain	sbcverify-143788.webflow.io (<Phishing Keyword used>)
Hosting IP	172[.]64[.]151[.]8 and 104[.]18[.]36[.]248
Hosting Country	United States
Brand Spoofed	SBC Communications / AT&T
Platform Abused	Webflow (webflow.io)

6. MITRE ATT&CK Mapping

Field	Detail
Tactic	Initial Access (TA0001)
Technique	Phishing — T1566
Sub-technique	Spearphishing Link — T1566.002
Reference	https://attack.mitre.org/techniques/T1566/002

Justification: The attacker deployed a malicious URL hosted on the Webflow platform to direct victims to a fake SBC/AT&T verification page. The goal was to harvest user credentials via a spoofed login form. This maps directly to T1566.002 — Spearphishing Link, where an adversary sends a link to a malicious website to gain initial access.

7. Attacker Technique Observed

Living off Trusted Services (LoTS)

The attacker deliberately chose to host the phishing page on Web flow — a legitimate, well-known website builder. This technique is known as 'Living off Trusted Services' and is commonly used to:

- Bypass URL reputation filters that whitelist known hosting platforms
- Inherit SSL certificates from the parent domain for false legitimacy
- Reduce detection rates across security vendor databases
- Quickly spin up and tear down phishing pages using free-tier accounts

8. Recommended Actions

Action	Details
Block URL	Add https://sbcverify-143788[.]webflow[.]io/ to web proxy blocklists
Block Domain	Block sbcverify-143788.webflow.io at DNS/firewall level
User Awareness	Alert users about phishing pages hosted on trusted platforms
Report to Webflow	Submit abuse report to Webflow to take down the phishing page
Report to PhishTank	Ensure URL is verified and listed on PhishTank database
Credential Reset	If any user visited the page, force immediate password reset

9. Analyst Summary

The URL <https://sbcverify-143788.webflow.io/> has been confirmed as a phishing page impersonating SBC Communications / AT&T. The attacker leveraged the Webflow platform to host a fraudulent verification page designed to steal user credentials.

Key findings include: complete absence of email authentication records (SPF, DKIM, DMARC), positive phishing classification by AlphaMountain.ai on VirusTotal, use of social engineering keywords in the subdomain, and hosting in the United States on Webflow infrastructure.

This incident maps to MITRE ATT&CK T1566.002 — Spear phishing Link. Immediate action is recommended to block the domain and notify potentially affected users.
